PROFESSIONAL SUMMARY

Content and Technical Writer with **9 years of experience** creating educational, technical, SEO, and thought leadership content for global audiences. I specialize in transforming complex topics in artificial intelligence (AI), machine learning, data science, software engineering, and emerging technologies into clear, engaging, and technically accurate articles, tutorials, case studies, white papers, and long-form guides.

Since **2020**, I have partnered with international clients through Upwork, earning **\$20,000+**, achieving **Top Rated** status, maintaining consistent **5-star reviews**, and building long-term relationships with repeat clients. Alongside my client work, I have published **140+ articles** on Medium, built an audience of **970+ followers**, contributed to publications including **Never Stop Writing**, **Good Vibes Good Life** and **Catharsis**, and founded **Mindful Data Science**, where I publish practical AI and data science tutorials.

I combine strong research skills, technical expertise, storytelling, and SEO best practices to create content that educates, engages, and helps organizations communicate complex technologies with clarity and confidence.

-

PROFESSIONAL EXPERIENCE

Content & Technical Writer

Upwork & Direct Clients

June 2020 – Present

Create research-driven technical and marketing content for startups, SaaS companies, AI organizations, and technology businesses across multiple industries.

Key Achievements

- Earned **\$20,000+** delivering technical and content writing services to international clients.
- Achieved **Top Rated** status while maintaining consistent **5-star client reviews**.
- Built long-term relationships with repeat clients through reliable, high-quality content delivery.
- Produced technical articles, blog posts, tutorials, white papers, case studies, website content, and thought leadership covering artificial intelligence, machine learning, data science, analytics, software engineering, cloud technologies, and emerging technologies.
- Conducted extensive research using technical documentation, research papers, product documentation, and interviews with subject matter experts to ensure technical accuracy.
- Simplified complex engineering and AI concepts into engaging, reader-friendly content for technical and non-technical audiences.
- Applied SEO best practices to improve search visibility without compromising technical depth or readability.
- Managed the complete content development lifecycle, including research, outlining, writing, editing, revision, and publication.

Founder & Editor

Mindful Data Science

2025 – Present

Founded an independent publication dedicated to making artificial intelligence, machine learning, and data science more accessible through practical, research-driven educational content.

Key Achievements

- Published **10+ technical articles** covering AI, machine learning, computer vision, Python, data science, and real-world AI deployment.
- Translate complex research into practical tutorials for learners, engineers, and technical professionals.
- Create original educational content connecting academic concepts with real-world industry applications.
- Build a growing publication focused on helping readers understand advanced AI concepts without sacrificing technical accuracy.

Independent Writer & Essayist

Medium

July 2023 – Present

Built an engaged readership through authentic storytelling, educational writing, and thought-provoking essays.

Key Achievements

- Published **140+ original articles** across artificial intelligence, software, personal growth, relationships, creativity, resilience, and motherhood.
- Built an engaged audience of **970+ Medium followers**.
- Published in established Medium publications including **Good Vibes Good Life** and **Catharsis**.
- Produced high-performing stories receiving **3,100+**, **1,600+**, and **400+ claps**.
- Developed a distinctive writing voice combining technical depth, emotional intelligence, and compelling storytelling.

- Produced articles generating consistent reader engagement through recommendations, comments, and shares.
