

CAROLINE GAKII

Data Scientist | AI Trainer | LLM Evaluator | Machine Learning Researcher

Meru, Kenya

Email: caratechconsultancy@gmail.com

[LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Data Scientist and AI professional with hands-on experience evaluating large language models, developing machine learning solutions, and applying AI to real-world problems. Experienced in structured AI evaluation, prompt assessment, multi-turn reasoning analysis, model validation, and computer vision research.

Currently pursuing a Master's degree in Data Science while combining research experience with practical industry work evaluating frontier language models. Skilled in Python, SQL, TensorFlow, machine learning, deep learning, computer vision, and AI quality assurance. Passionate about building reliable AI systems through rigorous evaluation, data-driven experimentation, and evidence-based decision making.

CORE COMPETENCIES

Artificial Intelligence

- LLM Evaluation
 - AI Model Assessment
 - Prompt Evaluation
 - RLHF Concepts
 - Supervised Fine-Tuning (SFT)
 - Structured Reasoning Evaluation
 - AI Quality Assurance
 - Response Ranking
 - Prompt Engineering
-

Machine Learning

- Machine Learning
 - Deep Learning
 - Computer Vision
 - CNN Development
 - TensorFlow
 - Keras
 - Model Validation
 - Hyperparameter Tuning
-

Data Science

- Python
 - SQL
 - Pandas
 - NumPy
 - Data Analysis
 - Data Cleaning
 - Feature Engineering
 - Data Visualization
-

Evaluation

- Root Cause Analysis
 - Fact Verification
 - Error Analysis
 - Analytical Reasoning
 - Rubric-based Evaluation
 - Quality Assurance Alignment
 - Documentation
-

PROFESSIONAL EXPERIENCE

AI Trainer

Turing

May 2026 – Present

Evaluate large language model outputs using structured quality guidelines to improve model performance, reasoning, and factual accuracy.

Key responsibilities:

- Evaluated AI-generated responses across complex reasoning and instruction-following tasks.
 - Compared multiple model outputs using structured evaluation rubrics.
 - Identified hallucinations, factual inaccuracies, logical inconsistencies, and reasoning failures.
 - Wrote detailed evidence-based justifications supporting evaluation decisions.
 - Worked on evaluation projects involving NVIDIA Nemotron and Qwen language models.
 - Designed prompts that challenged model reasoning and exposed failure cases.
 - Maintained high annotation quality while adhering to strict evaluation standards.
 - Contributed human feedback used to improve large language models.
-

Business Analyst

Turing

March 2026 – May 2026

Performed structured quality evaluations of AI-generated content while supporting annotation and evaluation workflows.

Achievements:

- Conducted side-by-side comparisons of AI responses.
 - Applied structured evaluation criteria to ensure consistency across assessments.
 - Validated factual correctness using reliable evidence.
 - Identified reasoning errors, unsupported assumptions, and inconsistencies.
 - Produced clear evidence-based explanations for evaluation decisions.
 - Supported continuous improvement of evaluation quality through analytical feedback.
-

MACHINE LEARNING PROJECTS

AI-Powered Digital Microscope for Cancer and Malaria Diagnosis

Master's Research

Developed an AI-assisted digital pathology workflow using computer vision models for histopathology image classification.

Highlights:

- Trained convolutional neural networks including ResNet50V2, EfficientNetV2, MobileNetV2, DenseNet121, and CoAtNet.
 - Performed dataset preprocessing, augmentation, and model optimization.
 - Evaluated models using Accuracy, Precision, Recall, F1-score, ROC-AUC, Sensitivity, and Specificity.
 - Investigated domain shift and model generalization across medical imaging datasets.
 - Integrated AI with an OpenFlexure digital microscope for low-cost diagnostic support.
-

DATA ANALYSIS EXPERIENCE

Applied Python extensively throughout research and AI projects to analyze large datasets and validate experimental results.

Experience includes:

- Cleaning and preprocessing structured and image datasets.
 - Exploratory data analysis using Pandas and NumPy.
 - Data visualization using Matplotlib.
 - SQL querying for retrieving, filtering, joining, and analyzing datasets.
 - Model validation across multiple datasets.
 - Statistical analysis and performance comparison.
 - Interpretation of machine learning evaluation metrics.
-

TECHNICAL SKILLS

Programming

- Python

- SQL

Machine Learning

- TensorFlow
- Keras
- Scikit-learn

Libraries

- Pandas
- NumPy
- Matplotlib

Development

- Git
- GitHub
- Jupyter Notebook

SELECTED ACHIEVEMENTS

- Evaluated frontier language models through structured AI quality assessment projects.
- Applied analytical reasoning to identify logical errors and improve AI-generated outputs.
- Built multiple computer vision models for healthcare applications.
- Conducted research on domain shift and machine learning model generalization.
- Published technical articles explaining AI, machine learning, and data science concepts for a global audience.

EDUCATION

Master of Science in Data Science (Ongoing)

Meru University of Science and Technology

Relevant Areas:

- Machine Learning
- Deep Learning

- Data Mining
- Time Series Analysis
- Big Data Analytics
- Optimization

Bachelor of Computer Technology

Meru University of Science and Technology

PROFESSIONAL STRENGTHS

- Critical Thinking
- Analytical Reasoning
- AI Evaluation
- Technical Communication
- Research
- Problem Solving
- Attention to Detail
- Collaboration
- Continuous Learning
